

Gravity 2232Wh - Solar Generator

Solar Power Generator - Ideal For Residential Back-Up and Industrial Use

The Gravity 2232 is a very high capacity portable generator, capable of providing high AC power and DC power for all your devices. It works just like a generator, but without emitting any noise nor burning any fuels, unlike traditional diesel generators. The Gravity 2232 solar power generator can be recharged via wall outlet (the charger is provided) or via solar panels. We recommend using the adequate Sunslize 150W solar panels to charge your Gravity 2232 quickly and efficiently.
